

EVENT AGENDA

Salon Fillmore 1,2,3 & 4

April 23

11:00 am – 6:00 pm Check-In: VIP Reserve Area. Main Lobby. Hard Rock Hotel

7:00 pm – 10:00 pm Welcome Cocktail at Canal de Aguas

April 24

Topic

Speaker

7:30 am – 8:30 am

Breakfast

8:30 am – 8:45 am

Assembly in Conference Room

8:45 am – 9:15 am

Welcome

Ray Collins

9:15 am – 10:30 am

Your Exponential Future

Paul D. Roberts

10:30 am – 10:45 am

Coffee Break

10:45 am – 11:30 am

Gen AI: Postcard from the Near Future

Jeff Loucks

11:30 am – 12:30 pm

Blockbuster Cybersecurity

John Sileo

12:30 pm – 2:00 pm

Lunch

2:00 pm – 3:00 pm

Crossing Borders: The Future of Data Infrastructure and International Connectivity

Daniel Torras

3:00 pm – 4:00 pm

Industry Panel

Moderated by Paul D. Roberts

4:00 pm – 4:15 pm

Coffee Break

4:15 pm – 5:15 pm

Bring Impossible Ideas to Life

Chris Barton

5:15 pm – 5:30 pm

Closing Remarks

Ray Collins

7:00 pm – 10:00 pm

Dinner at Playa Ipanema

LIVE Translation available for conferences in Spanish

Liberty Networks Leadership Team

Ray Collins

SVP, Infrastructure & Corporate Strategy

Ray is the Senior Vice President, Infrastructure and Corporate Strategy of Liberty Latin America (LLA) and CEO of Liberty Networks. He is responsible for LLA's Strategy and Corporate Development, including Mergers & Acquisitions, strategic planning, and implementation. He also oversees the Liberty Networks business, covering B2B in Latin America and the wholesale business.

Daniel Neiva

VP, General Manager Latin America

Daniel is the Vice President and Chief Commercial Officer for B2B in the LATAM region, responsible for the operations in Colombia, Dominican Republic, El Salvador, Guatemala, and Honduras. Under this role, Daniel is responsible for the full B2B customer journey including commercial, implementation and support.

Carmine Sorrentino

SVP, Infrastructure & Corporate Strategy

Carmine is the Vice President and Chief Commercial & Operating Officer for the wholesale business. He leads the wholesale division's commercial and strategic growth and is responsible for the strategy, customer experience, and driving the business's success across the LLA region.

Liberty Networks Leadership Team

Peter Collins

Engineering & Operations

Peter leads Technology and Innovation of the Wholesale Networks business. He is responsible for the international subsea, B2B networks and national subsea and terrestrial networks across the Liberty Latin America footprint.

Magín Briceno

VP, Chief Financial Officer

Magín is Liberty Networks' Vice President and Chief Financial Officer. He is responsible for the group's finance operations, including financial planning, accounting and external reporting matters, and strategic oversight of the company's financial performance across the Enterprise and Wholesale businesses.

LINKS Keynote Speaker

Paul D. Roberts

Exponential Guide

Your Exponential Future

The speaker

Paul is a sought-after international speaker, heard by and guiding thousands of executives globally. He has given 280+ talks and facilitated 120+ programs to global audiences on topics ranging across multiple Exponential Technologies and the Future, Antifragile Strategies, Building Exponential Enterprises, the Power of Platforms and Network Effects, Digital Transformation, Exponential Innovation, Exponential Leadership, and Navigating Change.

About the conference

The emergence of a new era driven by exponential technologies such as AI, Digital Biology, XR, Quantum Computing, Nanotechnologies, and Space travel, emphasizes that the future will be unlike the past. We live in an age of discovery, invention, possibilities, and responsibility. In this exciting and engaging conference, Paul will lead participants through a journey into this future, exploring new mental models and potential advancements such as zero escape velocity of medicine, the power of digital biology, and the integration of AI and quantum computing to create abundance while preserving the natural world. The conference prompts reflection on actions needed today to shape the desired future and the necessity of unlearning old paradigms.

Jeff Loucks

Executive Director, Deloitte CTMT

Gen AI: Postcard from the Near Future

The speaker

Jeff is the founder and executive director of Deloitte's Center for Technology, Media, and Telecommunications. Using original research and deep industry expertise, the TMT Center develops insights that reveal emerging trends, so executives can anticipate change rather than reacting to it.

About the conference

With generative AI, now truly does decide next. Amid this year of breathtaking change, the Deloitte AI Institute is conducting a year-long report series tracking the pulse of generative AI. Our aim? To help leaders in business, technology, and the public sector navigate this dynamic period. During this space, we will discuss the lessons we have learned and how to move forward with gen AI amid uncertainty.

LINKS Keynote Speaker

John Sileo

CEO & President, The Sileo Group

Blockbuster Cybersecurity

The speaker

John Sileo lost his million-dollar startup, his wealth, and two years of his life to cybercrime. The losses not only destroyed his company and decimated his life savings but consumed two years of young fatherhood as he fought to stay out of jail. John shares his story and hard-earned wisdom as a cybersecurity expert. President and CEO of The Sileo Group, a Colorado-based think tank, John graduated with honors from Harvard University and was recently inducted into the National Speakers Hall of Fame.

About the conference

Hackers don't just adapt to change; they bank on it. Has your mindset evolved? The rapid expansion of remote workforces, ransomware gangs, cloud jacking, IoT hacking, supply chain attacks, social engineering and disinformation campaigns have altered the way we must defend our data, reputation, and profits. A faulty adage asserts that humans are your weakest link when in reality, they can be your greatest defense. Cybersecurity doesn't grow from shinier tools, but from the powerful intersection between human beings and technology. In this keynote presentation, John will leverage potent lessons learned from losing everything to cybercrime as well as a humorous live-hacking demonstration to build a Blockbuster Framework for analyzing, organizing, and communicating your powerful cyber defense strategy.

LINKS Keynote Speaker

Daniel Torras

Altman Solon

Crossing Borders: The Future of Data Infrastructure and International Connectivity in Latin America and the Caribbean

The speaker

Daniel is a partner at Altman Solon, where he advises operators and investors on value creation strategies in the telecom and digital infrastructure space, including growth and go-to-market strategy, operational optimization and M&A transaction advisory support, with a particular focus on Latin America and the Caribbean. Prior to his current position, Daniel held several senior roles in corporate strategy and post-merger integration at Millicom.

About the conference

“Crossing Borders: The Future of Data Infrastructure and International Connectivity in Latin America and the Caribbean” explores the rapid growth of data generated by humans and machines, and how Latin America and the Caribbean compare to other regions in terms of adoption and technological readiness. The presentation discusses the rapid evolution towards high-speed data networks (be in FTTH or 5G), the migration of business operations to the cloud, the increasing importance of edge computing, and the strategic role of hyperscalers in distributing cloud services across the region. It also highlights how the evolving nature and complexity of the solutions demanded by corporates and carriers are impacting service providers in the region. The presentation will be followed by a firechat with Liberty Latin America’s Daniel Neiva and Carmine Sorrentino to delve deeper into these topics and provide perspectives on future developments.

LINKS Keynote Speaker

Chris Barton

Shazam Founder

Bring Impossible Ideas to Life

The speaker

When Chris came up with the idea of identifying music out of thin air, everyone said it was impossible. Then, he embarked on a journey to make it possible through not just one but many innovations (Shazam). He has continued to invent new things and learn from amazing innovators during 8 years at Google, 4 years at Dropbox, and as founder of his new company, Guard.

About the conference

Technology & AI are dramatically changing what's possible in our world. Our challenge as we create new things is to dislodge from the comfort of what we already know. Chris created Shazam after being told by every "expert" that his outlandish idea was impossible. It was an idea far ahead of its time – eight years before iPhone apps even existed. In this presentation, Chris helps audiences imagine and then create new visions for the future. He inspires with jaw-dropping stories about creating Shazam and shows how innovation comes from not just an idea but from a series of insights to overcome obstacles along the way. the desired future and the necessity of unlearning old paradigms.
